The Chapter meetings are held on the first Wednesday of the month. All meetings are open to anyone with an interest in building, restoring, and flying airplanes. The normal monthly meeting will be held at the Chapter's hanger which is the old Aerotel hanger located on the south side of the American Aviation hangers. Meetings start at 7:00 PM. There's ample parking on the ramp in front of the hanger. Please note that the Chapter does not meet during the months of July and August.

President's Corner:

Greetings Chapter Members.

Last meeting new member badges were ready to be picked up

The chapter didn't have much representation at the annual Winter Haven fly in

The Local EAA Speaker Bureau will provided a commitment for a registered speaker. I have a commitment for January. Presentation will be about what General Aviation will look like 30 years from now.

Last month a very critical piece of chapter business was accidentally left of the agenda. That officer nomination for chapter officers. This must be the first order of business since the names of chapter officers have to be provided to 'EAA headquarters

During the past month we were to host Young Eagles but it was cancelled due to weather.

Though the efforts of Jim Doan the hanger now has two outside signs showing EAA Chapter 1298. Jim did an excellent job and is to be commended.

See you on Wednesday. Coffee and Donuts and by request, I'll try to get some bagels

Bernie

Secretary Report:

The secretary's report input was missing. This is the first time this has happened.

Short Finals - Overheard in IFR Magazine's "On the Air"

Controller to transitioning aircraft: "Do you have Miami's altimeter?"

Student pilot (after long pause): "No sir, this one belongs to the flight school where I rented the plane."

The student pilot radioed for taxi instructions, sounding pretty nervous. When the tower asked if he was departing IFR or VFR, his reply was: "No, I'm G.I. Bill"

UUA /OV BUSCH STADIUM/TM 0153/FL050/TP UNKN/RM SMALL ROUND WHITE OBJECT GOES PAST
MARIS

From our "is it soup yet?" file...

NY Center: USAir 312, what is your ride like?

USAir 312: Oh man, I got whitecaps in my coffee!

NY Center: American 435, what's your ride like?

American 435: Dunno, we haven't been fed yet...

Apparently, an owner of an Aztec in Africa had an engine problem in some rather remote location and was considering trying to take off and fly the airplane on one engine to a maintenance base. The message he sent to Piper's engineering department ended with the question, "How long will it take to take off on one engine?"

This request for information made its rounds within engineering until it got to the Aztec project engineer who replied, "Ask him if he wants that in miles or months."
